PROFESSIONAL SUMMARY:

A solution oriented Data professional skilled in statistical analysis, graphical visualization, database management and predictive modelling using tools such as Python, MySQL and Git supported by hands-on experience with large datasets, dashboards and projects with strong analytical and critical thinking abilities.

SKILLS:

- **Technical skills:** Python(Pandas, NumPy, Matplotlib, seaborn, scikit-learn, Tensorflow), MySQL, MS Excel, Tableau, Git/GitHub, Jupyter notebook
- **Data Skills:** Exploratory Data analysis, Data visualisation, Database management, Time series analysis, Machine Learning, Data preprocessing

PROJECTS:

- **Financial Fraud Detection| Python, Supervised learning**
 - Developed a fraud detection model to identify suspicious transactions using transaction patterns, account balances, and customer attributes to support risk assessment.
- **Tesla stock price Analysis and Forecasting| Python, Time series analysis**
 - Performed exploratory data analysis and forecasted stock price trends by analyzing historical patterns, seasonality, and market behavior using time series modeling.
- **Tech Layoffs Analysis| MySQL, Database management**
 - Cleaned and analyzed global tech layoff data to uncover workforce reduction trends, company-wise impacts, and year-over-year layoff patterns through SQL-based analysis
- **Social Media Recommendation Engine | Python, Text Data Processing, Unsupervised learning**
 - Collaborated to build a social media app with a recommendation system that grouped users based on interests and engagement patterns to improve personalized experience.

EXPERIENCE

- **Associate Analyst | GlobalLogic (Jan 2026 - April 2026)**
 - Cleaned, modified and analysed large scale datasets to support AI/ML model development while ensuring accuracy and comprehensibility in delivering insights.
- **Data Science Intern | Tech-A-Intern (Jul 2023 – Aug 2023)**
 - Analyzed and visualized datasets to generate business insights and developed predictive machine learning models to support data-driven decision-making.
- **Data Science Intern | ICT Academy (Aug 2023 – Oct 2023)**
 - Built machine learning and NLP solutions for sentiment analysis, information extraction, and personalized recommendation systems using real-world datasets.

EDUCATION:

- **Bachelor's in Computer Applications(2021 to 2024)| Specialization in Data Science**
 - Maharaja Surajmal Institute, GGSIP University, Delhi

CERTIFICATES

- **Elite certificate**, Introduction to Machine Learning Course, IIT Kharagpur, issued by NPTEL

- **SQL (Basic-** simple queries, relationships, and aggregators), issued by HackerRank.
- **SQL (Intermediate-** complex joins, unions, stored procedures and sub-queries), issued by HackerRank.
- **SQL (Advanced-** query optimization, data modeling, Indexing, window functions and pivots), Issued by HackerRank.
- **Python (Basic-** Variables, Operators, Control Flow, Strings, Collections, Iteration and OOP), issued by Hacker Rank.
