👤 PROFESSIONAL SUMMARY

A Data professional experienced in performing end-to-end analytics to extract business insights through operations ranging from **querying and cleaning data** to **creating dashboards and deploying ML models** using tools such as **Python, MySQL and Tableau**. Currently serving as an **Associate Analyst at GlobalLogic**, where I **collect, label, validate, preprocess and evaluate** large multi-format datasets to train **Physical AI and Generative AI**.

🧠 SKILLS

Programming Languages: Python(Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Tensorflow), SQL(MySQL)

Technical Tools: MS Excel, Tableau, Git/Github

Core competencies: Data Visualization, Dashboard development, Database querying, Machine Learning, Data preprocessing, Feature Engineering, Time Series Analysis, Exploratory Data Analysis, Statistical analysis, Model Evaluation

📁 PROFESSIONAL EXPERIENCE

Associate Analyst- Content Engineering, GlobalLogic Gurugram, India | 01/2026 – Present

Collaborated on projects to train robotic intelligence and audit generative AI outputs for anomalies maintaining 95%+ accuracy by collecting, labeling, preprocessing and evaluating extensive datasets in various formats

Data Science intern, ICT academy Remote | 08/2023 – 10/2023

Developed Machine Learning and NLP solutions that improved customer satisfaction by 15% by implementing sentiment analysis, information extraction and personalized recommendation systems using Python

Data Science intern, ThinkINK AI Noida, India | 07/2023 – 08/2023

Supported data-driven decision-making with regression and classification models achieving 87% accuracy by analyzing datasets, developing predictive models and designing dashboards using Python.

📁 PROJECTS

Tesla stock price Analysis and Forecasting, Python, Time series analysis, Supervised learning

Visualized and documented insights by analyzing historical trends and patterns, seasonality and market behavior using ACF/PACF plot & moving average, forecasting using SARIMA modelling and evaluating using KDE plot of residue

Tech Layoffs Analysis, MySQL, Database querying, Exploratory Data Analysis

Cleaned and analyzed global tech layoff data to uncover workforce reduction trends, company-wise impacts and year-over-year layoff patterns performing operations like CRUD, aggregations, sorting and joins through SQL querying.

Social Media Recommendation Engine, Python, Data Preprocessing, Unsupervised learning, Recommendation engines

Collaborated to build a social media app with an adaptive recommendation engine that grouped users based on interests and engagement patterns through clustering techniques such as KNN and cosine similarity to improve user experience.

🎓 EDUCATION

Maharaja Surajmal Institute, GGSIP University, BCA (Data Science) Janakpuri, Delhi | 11/2021 – 07/2024

Scored **8.2 CGPA** covering relevant coursework including Python programming, Databases, Mathematics, Machine Learning, Data visualization, Data Structures and Algorithms.

📜 CERTIFICATES

- **Introduction to Machine Learning- IIT Kharagpur (Elite rank certificate), NPTEL**
- **Python (Basic), HackerRank:** Variables, Operators, Control Flow, Loops, Strings, Data types, Functions, File I/O, OOP
- **SQL (Basic, intermediate and Advanced), HackerRank:** Simple queries, relationships, aggregators, complex joins, unions, stored procedures, views, query optimization, Indexing and window functions
